

# SEND Analysis Dashboard

*Tower Hamlets*

**October 2019**

Produced on 11/10/19

## Purpose of this dashboard

This dashboard draws together a range of SEN indicators into a concise, graphical report. It compares your LA performance with national and statistical neighbours, as well showing trends over time. It can be used to:

- identify relative strengths and weaknesses in performance
- plan and commission services
- inform self-evaluation and set targets
- demonstrate impact and effectiveness

The dashboard covers key datasets outlined in the Ofsted SEN Inspection Handbook that inspectors will use when making their evaluations<sup>1</sup>. The dashboard should therefore be particularly useful in preparation for and during an Ofsted inspection, as well as informing planning throughout the year.

## Contents

- 3 How to interpret the analysis**
- 4 Prevalence & characteristics - School population**
- 5 Prevalence & characteristics - Resident population**
- 6 Provision for SEND pupils**
- 7 Primary attainment**
- 8 Secondary and post-16 attainment**
- 9 Pupil destinations**
- 10 Absence**
- 11 Exclusions**
- 12 Adulthood & implementation**
- 13 Finance**

<sup>1</sup> See paragraphs 5 and 44 of the SEN inspection handbook at: [www.gov.uk/government/publications/local-area-send-inspection-guidance-for-inspectors](http://www.gov.uk/government/publications/local-area-send-inspection-guidance-for-inspectors)

## How to interpret the analysis

Each indicator on the dashboard has:

- a trend line to show the LA's change over time for up to four years (subject to availability of the data)
- a rank of the LA indicator against its 10 statistical neighbours and the 152 LAs nationally (although in some instances some LA data is suppressed and therefore excluded from the rankings)
- two bar charts showing the difference to the LA's statistical neighbour average and the national average. Note that if the indicator is a percentage the difference is in percentage points; for example, 20% vs 23% is a 3% point difference. If the indicator is a number, the difference is a percentage, for example, 100 vs 110 is a 10% difference
- a 4 year trend showing how the LA performs vs national based on the same basis as the two bar charts. The latest year of data is on the right.

There are two types of indicator, performance indicators and volume & incidence indicators, as shown below:

### Performance indicators

Performance indicators are those that allow the measurement of "better" or "worse" performance. Note that for some performance indicators better performance means a higher percentage (e.g. achievement of attainment thresholds), while in other cases lower means better (e.g. absence rates).

The best performing statistical neighbour has a rank of 1st, while the worst is ranked 11th

The best performing LA has a rank of 1st, and the lowest nationally is ranked 152nd

A 4 year trend of how you compare to national

Trend lines show the best year's performance with a green dot, and the worst with a red dot

Latest year is on the right of the line

The bar is green where the LA performs better than the statistical neighbour or national average, and red when worse. If the gap is greater than 5% an arrow is shown on the end of the bar

Latest year is on the right

### Volume & incidence indicators

Volume & incidence indicators have no "better" or "worse" performance, just more or less of something.

The bar is purple where your LA has a larger volume or incidence than the average, and orange when lower

Latest year of published data highlighted in grey

Any unpublished data or data which differs to the published value will appear as bold and blue

LA trend lines show the year with the largest volume or incidence in purple, and the smallest in orange

The statistical neighbour with the highest volume has a rank of 1st, while the smallest is ranked 11th

Usually the statistical neighbour rank is out of 11 and national out of 152. This may vary if some LA data is suppressed for an indicator.

'-' means data is unavailable. '\*' means data is suppressed for data protection reasons

EHCP includes statemented. SEN Support refers to non-statemented SEN. Historically, this included school action and school action plus.

	EHCP pupils transferred to special/independent schools	65	69	24	<b>10</b>												
	EHCP pupils transferred from special/independent schools	5	20	7	<b>5</b>												

Usually the statistical neighbour rank is out of 11 and national out of 152. This may vary if some LA data is suppressed for an indicator.

'-' means data is unavailable. '\*' means data is suppressed for data protection reasons

EHCP includes statemented. SEN Support refers to non-statemented SEN. Historically, this included school action and school action plus.

	Tower Hamlets					Statistical Neighbours			England							Note

	Short breaks (respite) for disabled children	-	£28	£27	£26	£21	4th	-24%	-	£18	£18	£17	31st	-52%			
Other support for disabled children	-	£0	£0	£0	£3	5th	-100%	-	£4	£4	£4	96th	-100%				

\*Gross budget data is presented per capita for comparability. This is generally based on resident population of all young people of the relevant age. National data is a weighted mean.

Usually the statistical neighbour rank is out of 11 and national out of 152. This may vary if some LA data is suppressed for an indicator.

'-' means data is unavailable. '\*' means data is suppressed for data protection reasons

EHCP includes statemented. SEN Support refers to non-statemented SEN. Historically, this included school action and school action plus.

## Statistical neighbours

Statistical neighbours are a way of benchmarking your performance against other local authorities that have similar characteristics, rather than simply being geographically close. The statistical neighbours for Tower Hamlets are listed below by school population size (larger authorities will often be higher ranked on indicators that are based on volume).

LA	School population
Birmingham	214,000
Manchester	94,000
Newham	65,000
Tower Hamlets	48,000
Hackney	45,000
Haringey	42,000
Luton	40,000
Camden	33,000
Westminster	32,000
Hammersmith and Fulham	28,000
Islington	26,000

NB. The statistical neighbour average in the dashboard is non-weighted and includes Tower Hamlets.

## Data sources

Below is the list of data sources including the latest year of data shown on the dashboard. Full footnotes and methodologies can be found within the individual sources.

**Note, if text is blue**, the data comes from your local sources and is therefore unpublished. In this instance, statistical neighbour and national averages will be unavailable for that year, and instead will show comparisons with the latest published data (shown in grey).

**Prevalence & characteristics - school and resident populations**
