

You Said	We Did
How do we stay up to date with the latest AfC COVID-19 information?	We created a COVID-19 specific section which has updates on Education, Wellbeing, Health and much more. We wanted our community to stay informed and we worked with multiple teams to create a large resource that users can benefit from.
Can the translation/accessibility tool be made more visible	We worked with ReciteMe to add a new toolbar across the website. We now have a whole host of languages, audio tools, magnifying tools, colour schemes available. Making it much easier for people with disabilities to navigate around the website
How can we contribute our thoughts on services	We now have a Family Feedback form that takes into consideration. To support practitioners and managers to understand the difference we are making and areas for practice development. To use the information and trends to track impact over time as part of our quality assurance work
Where is the consultations page?	We have a page for consultations, that we encourage users to participate in to share their views on upcoming changes.
