Dementia Advisory Service.

Action 1

Organise education and training to staff

All staff will be given an introduction to Dementia Friendly Hartlepool and have a Dementia awareness session as part of their induction.

Action 2

Provide dementia friendly activities

We will ensure the staff within the Bridge will attend the Alzheimer's Society's Dementia Awareness Champion's training. This will enable all staff to deliver their own sessions to create more dementia friendly individuals, encouraging other organisations and businesses, which will hopefully give people who live with Dementia, a better experience.

Action 3

Provide support

We will support people living with dementia \ memory impairment, their families and friends providing information, signposting to relevant agencies. To also provide educational sessions to support people on a day to day basis.

Action 4

Raise awareness of Dementia

We will promote and be actively involved in Dementia Action Week, continuing to work closely with the Dementia collaborative in the implementation of D.A.W promotions and separate events in the week.
